

COIN JUGGLING

These two coin tricks are easy to master. With just a little practice you will be a skilled coin juggler. It is fun to learn this trick with somebody else.

OFF YOUR HAND

1. Put two coins on the back of your hand.
2. Flick your hand **UP**, tossing the coins in the air.
3. In the same flick, get your hand above the coins and come back down on them, catching the coins before they fall.

Your upward flick and your downward catch should be one continuous fluid motion.

OFF YOUR ELBOW

Bend your arm so that your hand is resting palm-up on your shoulder. Balance a coin on the tip of your elbow. By bringing your arm down very quickly, you should be able to catch the coin as it comes off your elbow. When you practiced a bit, you will be able to do it with more than one coin.
