

cat origami

MAKE A TALKING CAT

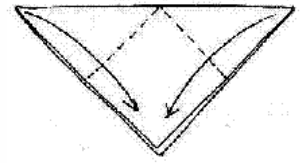

Start with a perfectly square piece of paper. Crease carefully.

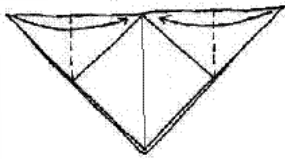

1. Make a center fold. Match the edges carefully. Unfold.

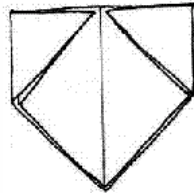

2. Fold the top corner to the bottom corner.

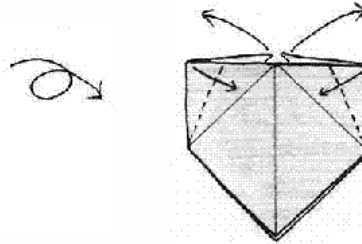

3. Make two creases by folding the top corners to the bottom point. After you fold these corners, unfold them again.

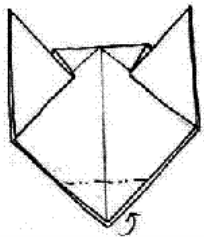

4. Fold the top left and right corners to the top center.

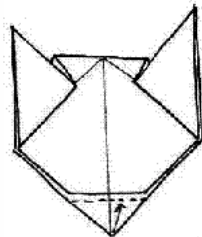

5. Turn the paper over.

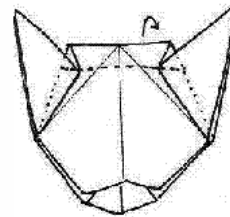

6. Fold the top left and right corners to the crease line. As you fold, let the triangles on the back side swing out.

7. Fold the top layer only INTO the model. This is the top lip.

8. Fold the bottom layer only INTO the model. This is the bottom lip.

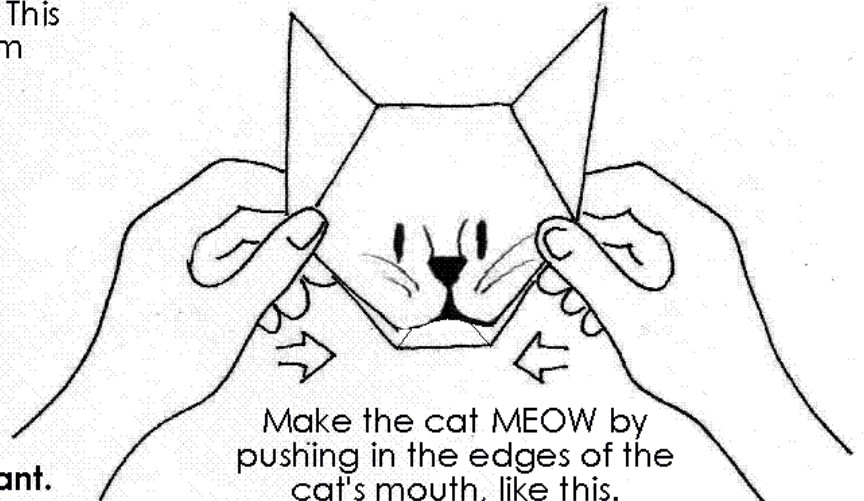

9. Fold the top section back behind the head as shown.

Finished Cat

Draw a face if you want.

Make the cat MEOW by pushing in the edges of the cat's mouth, like this.
