

CRAFT: DRINKING STRAW FUN

Supplies:

- ★ Plastic drinking straws (non flexible straws work the best)
- ★ Small, hand held pencil sharpener

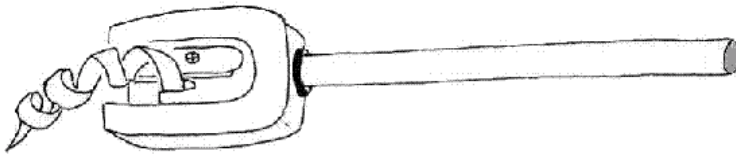

Optional accessories:

Beads, Pipe-cleaners, Pencils, Yarn, Elastic pony-tail holders

How to:

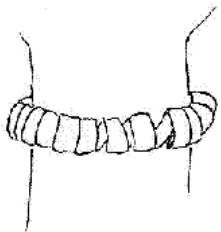

Simply twist a plastic drinking straw through a small hand-help pencil sharpener as if you were sharpening a pencil. (You might have a small pencil sharpener in your pencil case). This works best with a nice sharp pencil sharpener. If you have a little trouble starting the straw, snip a little slit on the end of the straw to help get the pencil sharper blade started.

The angle you hold the straw as you sharpen will determine the width of the coils. Experiment.

Idea One:

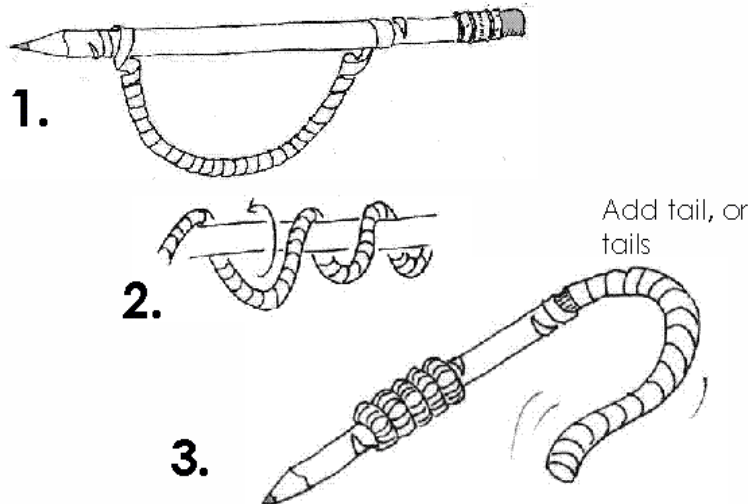

Make a bracelet or necklace:

Connect the ends to make a bracelet. You can also loop the straw around ponytail holders or yarn or pipe cleaners. Add beads, if you want.

Idea Two:

Decorate a pencil:

Idea Three:

Blow:
