

COLOR TOGETHER

Coloring gives you the opportunity to play with color and color combinations. Coloring patterns is a great way to help you to think about color.

Find a pal to color with. (You can even try to get an adult to color with you). Coloring side by side is a very easy, comfortable way of being together. Easy conversations often develop as you color. If you and your coloring buddy are coloring copies of the same pattern, you'll both be amazed how your different coloring approaches will result in dramatically different looking results. Color transforms!

MAKE YOUR OWN COLORING PATTERNS

You can make your own coloring patterns quite easily by simply making interesting squiggles that overlap themselves. You can also repeat shapes, or combinations of shapes. You can make coloring patterns for each other. Each partner colors the other partner's pattern.
