## Coin Juggling

**Idea**  
#5

These two coin tricks are easy to master. With just a little practice you and your child will be skilled coin jugglers. It will be fun to learn this trick together.

### *off your hand*

1. Put two coins on the back of your hand.
2. Flick your hand **UP**, tossing the coins in the air.
3. In the same flick, get your hand above the coins and come back down on them, catching the coins before they fall.

Your upward flick and your downward catch should be one continuous fluid motion.

### *off your elbow*

Bend your arm so that your hand is resting palm-up on your shoulder. Balance a coin on the tip of your elbow. By bringing your arm down very quickly, you should be able to catch the coin as it comes off your elbow. When you practiced a bit, you will be able to do it with more than one coin. (The trick is to keep your eye on the coins).
